

Electricity pricing changes

From 1 April 2022, our electricity distribution charges in your region will increase by an average of 7.7%.

We update our prices annually to reflect changes in how our network is used – such as the number of customers living and working in the areas we serve – and the cost of meeting your electricity needs.

This year's change is a combination of:

	Change	Weighting	Result
Distribution	10.2%	69%	7.0%
Transmission	2.1%	31%	0.7%
Overall			7.7%

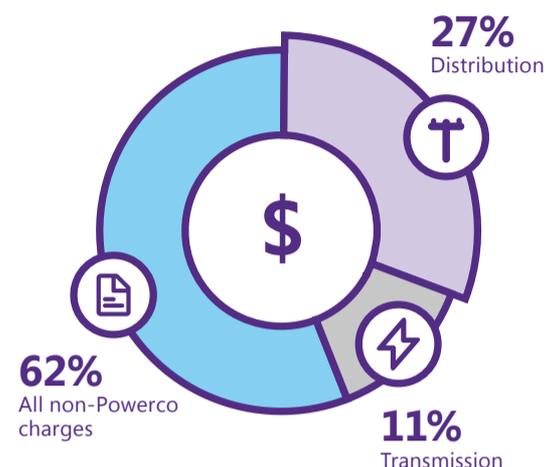

The impact on your electricity bill will depend on a few things, such as how you use our network and how your retailer chooses to repackage these changes for you.

Our charges make up around a quarter of your overall electricity bill. We also pass on Transpower's charges for the national transmission network (also known as the National Grid). These make up about another 11% of your electricity bill – see the chart on the right.

We own and manage the poles, wires, transformers, and other assets that deliver power to your door. We continue to invest in these assets to ensure your electricity supply is safe, reliable, and meets your needs – both now and in the future.

For more information about our pricing and what we're working on around our network, visit www.powerco.co.nz
